## **DETAILED ACTION**

This Office action is in answer to the amendment filed 5/4/2006.

## Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: the embodiment of figures 1, 3A, 4A, 5A providing a common battery housing including two batteries and a manual switch [see paragraph 0106 of the instant application].

Species II: the embodiment of figures 2A, 2B providing a battery housing including a manual switch and fill tubes for the electrolytic fluid [see paragraph 0114 of the instant application].

Species III: the embodiment of figures 3B, 4B, 5B providing a switching circuit between a main battery and a standby battery including a one way (backflow preventor) diode [see paragraph 0115 of the instant application].

Species IV: the embodiment of figures 6, 7 providing a "backpack" battery attachment system including two batteries and a manual switch located on the auxiliary battery [see paragraph 0123 of the instant application].

Species IV: the embodiment of fig. 8A providing an automatic controller for a switching circuit between a main battery and a standby battery including a one way (backflow preventor) diode [see paragraph 0129 of the instant application].

Species V: the embodiment of fig. 8B providing an automatic controller for a switching circuit including an indicator [see paragraph 0129 of the instant application].

Species VI: the embodiment of fig. 8C providing an automatic controller for a switching circuit including an SCR [see paragraph 0134 of the instant application].

Species VII: the embodiment of fig. 9 providing an automatic controller for an auxiliary battery discharge cycling system [see paragraph 0135 of the instant application].

Art Unit: 2838

Species VIII: the embodiment of fig. 10A providing an wireless controller for a dual battery system [see paragraph 0138 of the instant application].

Species IX: the embodiment of figures 10B, 11A, 11B providing a network interfaceable controller for a dual battery system and its method steps [see paragraph 0145 of the instant application].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Application/Control Number: 10/708,739 Page 4

Art Unit: 2838

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

- 3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Pia Tibbits whose telephone number is 571-272-2086. If unavailable, contact the Supervisory Patent Examiner Karl Easthom whose telephone number is 571-272-1989. The Technology Center Fax number is 571-273-8300.
- 4. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
